Download FlowJo v10 along with all plugins, add-ons and formats by clicking on the download link. Version: Accuri C6 BD Software. Desc: Downloads: The flow cytometry software Accuri C6 is designed to make it easy to analysis cell viability and apoptosis. Accuri C6 has 6 different set-ups to analyze cellular events in 6 different channels. Accuri C6 can be used with physical cell sorter systems including BD FACSAria and BD FACSDiva 6 for faster data acquisition. This product has been optimised to deliver fast data acquisition, higher data quality and higher data throughput. Accuri C6 uses a large monochrome touch screen, user friendly user interface and it is easy to drag the data files onto a separate workbook. There is an inbuilt flow cytometry software for data analysis. Accuri C6 makes working flow cytometry much easier and more efficient. This software has been designed and developed by BD to provide a combined solution for rapid data acquisition and analysis and make data analysis quick and easy. Accuri C6 can be run as a standalone software, in conjunction with the BD FACSDiva software or as a part of a fully integrated BD FACSCalibur software. Accuri C6 software supports import of cell data into Excel and and provide export of the data to Excel. Accuri C6 software is compatible with a variety of hardware devices including BD FACSCalibur and BD FACSAria equipment. Features: Working with BD Accuri C6 has a fast user-interface with various tools to help users quickly analyze data. Once data is loaded onto Accuri C6, users can analyze data in various ways with the ability to sort and export data. BD Accuri C6 software uses the best of BD's 7-color technology combined with two fluorescent channels. For sorting, Accuri C6 software has 10 channels for cell selection. This product is compatible with BD Influx, BD FACSCalibur and FACSCanto®III flow cytometers. BD Accuri C6 software runs on Microsoft Windows® XP and Windows Vista™ operating systems. This

product is compatible with Microsoft Windows XP and Windows Vista operating systems. Accuri C6 software requires a minimum Pentium III, 4GB or greater of system memory and 64MB or greater of RAM, and 1GB or greater of hard disk space to be installed in the computer. Accuri C6 software f678ea9f9e
